

WORK_EXPERIENCE O {

October 17, 2021 - CURRENT

// SOFTWARE ENGINEER

Omega One Developers - FIXI

Debugging code & Developing Android Applications in an Agile environment.
Managing Version control with Git & managing PRs.
Participates in story pointing, sprint planning, stand up, and refinement
Software & Business documentation management.
Product, company, and legal research.
helped build a large language model troubleshooter for FIXI

//MOBILE APP DEVELOPER - FIXI
OMEGA ONE DEVELOPERS

Roadside Assistance mobile application
Responsible for developing the Android side of this mobile application.
Utilizing tools like Android Studio, Java, Kotlin, Firebase, Stripe, and frameworks.

June 1- August 10 2024

// TARGET SOFTWARE ENGINEER
INTERN

Target Software Engineering Intern

Removed all references to websocket_apis
Reduced VCL footprint and simplified logic.
Deployed in prod.

Add TAP@GCP cluster routing capability in API configs for api.target.com
Increasing number of support requests from teams with TAP@GCP APIs looking to route traffic based on certain parameters to different clusters.

Currently

// Target TLP Engineer //Target Engineer

Worked in the TLP starter engineering program, where I worked on the Android my day service team, where we provide application assistance to team members across all of Target (Priority 1 TEAM)

- Kotlin
- Android Development
- Agile Environment
- Compose

Member of the Generative AI team supporting Legal Holds and internal AI initiatives. Engineered and maintained API routes to extract ChatGPT Enterprise user data, including designing a custom endpoint that aggregates user chats and project artifacts into structured ZIP archives to improve compliance, audit readiness, and usability. Collaborated with Microsoft 365 Agents to integrate AI-driven workflows and enhance enterprise productivity solutions.

- Kotlin
- Python
- Ai
- Agile environment
- Data retrieval
- SQL
- Postman

}
HARD_SKILLS O {

// Java // Android Studio // HTML // Vela
// Python // Atlassian Products // VCL // Kibana
// Kotlin // Microsoft Suite // Terraform // Swift
// Jira // Visual Studio Code // CSS // LLMs
// IntelliJ // Basic Digital // PHP
// Git // Google Suite // Java Script // Postman
Applications // Fastly // Apollo Exploration
// Apis // insomnia

}

Melanie Nunez

SOFTWARE ENGINEER

Software Engineer with experience in backend systems, API architecture, Android development, and enterprise AI integrations. Proven track record building scalable services, routing logic, and automation workflows in production environments at Target and Omega One Developers. My skills in programming and collaboration make me an ideal candidate for roles requiring teamwork and innovative problem-solving. In my free time, I enjoy exploring my interests in film, music, and philosophy.

EDUCATION O {

2021 - 2025

// BS COMPUTER SCIENCE

Texas A&M - San Antonio
Association for Computing Machinery
Greater Texas Foundation Scholar

2017 - 2021

// ASSOCIATE OF POLITICAL SCIENCE

South Texas College
Phi Theta Kappa Honors Society

// PROJECTS

2023

- RowdyHacks - Solar System: Thematic exploration of space through a social media platform that allows its users to explore their musical universe
- TamuHack- Piggybank Helper: Financial Literacy Learning App
- Won 1st place HackUTD- Calculate app: Hidden Financial literacy app through a calculator, that helps Demostic Abuse victims become financially independent from their abuser.
- Won at HackSaL- U-sub app: Business Track
- FIXI- Roadside Assistance App : helped build a large language model troubleshooter
- Added TAP@GCP cluster routing capability in API configs for api.target.com - Cluster Routing capability did this by creating an algorithm that is more dynamic for its users' needs.
- Myday app Spanish translation -Contributed to the translation in Spanish of the Myday application for the target team members

}

SOFT_SKILLS O {

// Professional writing
// Bilingual (English, Spanish)
// Communication
// Critical Thinking Skills

}

 melaniejnunez@gmail.com

 +1 956-530-9700

 San Antonio, Tx

To whom it may concern,

I am writing to express my interest in a Software Developer role with IBM. I am drawn to IBM's mission of applying intelligence, science, and innovative technology to help organizations and society solve complex problems through AI, hybrid cloud platforms, and trusted data solutions.

As a Computer Science graduate from Texas A&M University-San Antonio with professional experience in backend systems and enterprise software development, I am eager to contribute to software that supports meaningful technological impact.

In my current role as a Software Engineer at Omega One Developers, I develop, test, and maintain production application features for a mobile platform. My work involves implementing backend and API-related functionality, debugging software issues, managing Git-based version control, and collaborating within Agile development workflows to deliver reliable and well-tested features.

My prior experience includes working within an enterprise engineering environment where I supported infrastructure and routing logic improvements, refactored complex service configurations, and performed root cause analysis to enhance system reliability and performance. I am comfortable working with backend services, data workflows, and deployment considerations in production systems.

My technical skill set includes Java, Python, Kotlin, JavaScript, SQL, REST API integration, and foundational software architecture principles. I am particularly interested in cloud computing, containerized applications, and AI-assisted software development, and I am motivated to grow within modern software engineering ecosystems.

I am excited by the opportunity to contribute to IBM's engineering teams, collaborate in an innovative environment, and help build scalable, high-quality software that aligns with IBM's commitment to advancing intelligent, responsible technology.

Thank you for your consideration.

Sincerely,
Melanie Nunez

Sincerely,
Melanie Nunez
